SUMMARY

Senior Software Engineer with 9 years of experience building scalable systems and customer-facing products, with a strong background in backend engineering and modern TypeScript applications. Over the last 4 years, I've worked in fast-moving startup environments, taking ownership from product requirements and technical design through implementation, deployment, and production. I enjoy working across the stack, turning user problems into simple, reliable product experiences, and iterating based on real-world feedback and impact.

EDUCATION

Zagreb University of Applied Sciences
Master of Information Technology
Zagreb, Croatia 09/2017 - 02/2020

- Computer Science
- Module: Software Engineering

Zagreb University of Applied Sciences
Bachelor of Engineering in IT Technologies
Zagreb, Croatia 10/2013 - 02/2017

- Computer Science
- Module: Office Organisation and Automation

LANGUAGES

CROATIAN Native ●●●●●

ENGLISH Proficient ●●●●●

SKILLS

.NET • AWS • React • TypeScript • Firebase/GCP • C# • ASP.NET • Azure • Entity Framework • Git • CI/CD • SQL Server • PostgreSQL • Redis • Microservices • Modular monoliths

EXPERIENCE

Truestory (Contract) Remote
Senior Backend Engineer 06/2025 - 07/2026

- Owned backend features and integrations for a high-traffic experience marketplace, from technical design through production
- Built and evolved event-driven services and APIs across AWS, with a focus on scalability, reliability, and maintainability
- Improved product reliability, observability, and engineering workflows through refactoring and infrastructure automation

Infinum Croatia
Senior .NET Engineer 04/2021 - 06/2025

- Designed and delivered web applications and backend services across multiple products using .NET and cloud platforms
- Mentored engineers through code reviews, technical guidance, and knowledge sharing
- Wrote and reviewed technical articles, contributing to engineering knowledge across the organization

IN2 Group Croatia
Software Engineer 12/2018 - 04/2021

- Built and maintained web applications and backend services using .NET Core and .NET Framework
- Collaborated across engineering teams to improve application architecture and development workflows

Conscius Information Technologies Croatia
Software Engineer 07/2017 - 12/2018

- Developed, maintained, and tested .NET web applications with a focus on reliability and customer requirements

SELECTED PRODUCTS

Kvizalica 09/2026 - Present
www.kvizalica.hr
Real-time multiplayer trivia platform

- Founded, built and launched a real-time multiplayer trivia platform end-to-end, from product design to production
- Owning product development across React, TypeScript, Firebase, gameplay mechanics, monetization, and iteration based on user feedback

Truestory 06/2025 - 07/2026
www.truestory.com
Experience platform for booking curated activities

- Built and evolved backend services within a scalable, event-driven architecture
- Improved system reliability and performance through refactoring, structured logging, and infrastructure automation

Subs 01/2024 - 05/2025
www.subs.com
Social media network tailored for content creators

- Built and launched customer-facing features as part of a cross-functional product team
- Led development of core features and improvements
